

Control Systems Cybersecurity Training for Federal Employees and Contractors

The United States Department of Homeland Security Control Systems Security Program is pleased to announce the June 9, 2010 Introduction to Control Systems Cybersecurity training for Federal Employees and Contractors.

Where: The training will be held at the Hilton Arlington Hotel, located at the Ballston Metro stop. The address is: 950 North Stafford Street, Arlington, Virginia, 22203

Directions: Subway / Metro -Take the Orange Line to the Ballston-MU stop. At the top of the escalator walk straight into the Ballston Metro Center complex (20 feet). The hotel lobby is on the left. For driving directions visit: http://www1.hilton.com/en_US/hi/hotel/DCAVAHF-Hilton-Arlington-Virginia/directions.do

Parking is available at \$8.00 per day.

Who Should Attend? This training is provided specifically for federal employees and contractors associated with cybersecurity, policies, operations, and protective measures related to control and information technology systems in critical infrastructure. This includes operators, engineers, IT personnel, supervisors, and managers.

Wednesday, June 9, 8:00 am – 4:30 pm

Introduction to Control Systems Cybersecurity: The purpose of this course is to introduce students to the basics of industrial control systems security. Participants will gain a better understanding of the building blocks of control systems, where control systems are used within industry, what the risks (threats and vulnerabilities) are, and how mitigation strategies can increase the cybersecurity posture of control systems networks.

Registration: Please register for this training at: <https://secure.inl.gov/cssp062010>. There is no fee to attend this course.
